Good afternoon,

I am writing today in support of studying the use of electronic means for all public bodies in the Commonwealth. In addition I only support up to half of the normal meetings in an operational year be allowed to meet in this manner. I believe this to be a valuable technological need for public bodies to meet. Voting should also be allowed to occur during these meetings. Having electronic meetings allows for more access by the public citizenry and more participation by commissioners that have competing responsibilities. I am asking the subcommittee to draft language for full review by the FOIA Council.

Thank you for your consideration,

~Katrina Bailey, Hampton Citizens Unity Commissioner
